About ECCO

Mission Statement

ECCO will strive for an optimisation of care for patients with IBD in all aspects.

As part of this mission ECCO will adopt and further all efforts that lead to an improvement of the use of current therapies and procedures. Main aims include the development of guidelines with highest possible methodology and content quality and joint efforts to define better and more valid outcome parameters for the therapy of IBD.

Further aspects of the mission include the promotion of specialist, postgraduate education in IBD and the promotion of scientific projects in IBD. Such promotion can include intellectual input, funding and joint training using an ECCO defined curriculum. ECCO's visibility will be always as an organisation and not as the individuals making up ECCO. With all its activities the name of ECCO will stand in the world of gastroenterology for the highest possible level in quality and full impartiality in the results.

E-QUALITY

ECCO Quality of Care Project

Project Framework:

- Building on the ECCO Position Statement on Quality of Care Standards in IBD and the UR-CARE database
- Intended to ultimately improve the quality of care of patients living with IBD
- Quality standards identified in three main domains: Structure, Process and Outcomes
- With ECCO going global, we are opening the surveys world-wide
- Visit the public profiles
- Last chance for EU centres

**Gratefully acknowledging the unrestricted grant support

Scientific Programme

“Sustainability in IBD and beyond”

The Scientific Programme of the 20th Congress of ECCO provides attendees a high quality opportunity to learn from the world's leading specialists in the field of Inflammatory Bowel Diseases. It is structured around basic science, translational medicine and clinical sessions. The sessions focus on clinical practice founded on science with practical take home messages. Additionally, the programme features oral presentations of the top selected Congress abstracts.
