

Oxford IBD MasterClass 2016

Cutting edge clinical science and concepts in IBD

17–21 September 2016

University Examination Schools, Oxford, UK

An evolution to the hugely prestigious annual Oxford MasterClass combining three outstanding MasterClasses on IBD with a distinguished international faculty.

The MasterClass is a truly Oxford experience, combining cutting edge science and clinical practice in the wonderful setting of the University Examination Halls and leading Oxford Colleges.

For further information please visit www.oxfordmasterclass.org.uk and register for all three MasterClasses at a discount.

Very Early Onset Inflammatory Bowel Disease: genetics, immunology and patient care

17–18 September 2016

An outstanding programme covering new genetic defects associated with paediatric onset IBD, functional pathways, immune networks and implications for patient care.

Early IBD: the clinical science of IBD in practice

19–20 September 2016

An exceptional meeting on the pathogenesis, exposome, early diagnosis and therapy for IBD, with practical guidance on decision-making.

IBD endoscopy: advances in imaging

20–21 September 2016

A unique educational programme on the Endoscopy of IBD, providing exceptional plenary sessions on chromoendoscopy and live instruction from international leaders in the field.
