Inflammatory Bowel Diseases

Dear ECCO Members,

I am happy to contact you again with several new updates to share with you regarding the [ECCO e-Learning platform](#).

Three brand new **Skills Videos** covering the following topics are now available:

- Endoscopic assessment of CD recurrence
- IUS as a decision making tool in IBD
- Perianal Fistulas in CD

**ENDOSCOPIC
ASSESSMENT OF
CROHN'S DISEASE
RECURRENCE**
RUTGEERTS' SCORE

Marietta Iaccuci
EduCom Member

**IUS AS DECISION MAKING
TOOL IN IBD**

Giovanni Maconi
ECCO Member

Paulo Kotze
EduCom Member

**PERIANAL
FISTULAS IN CD -
SURGICAL MANAGEMENT**

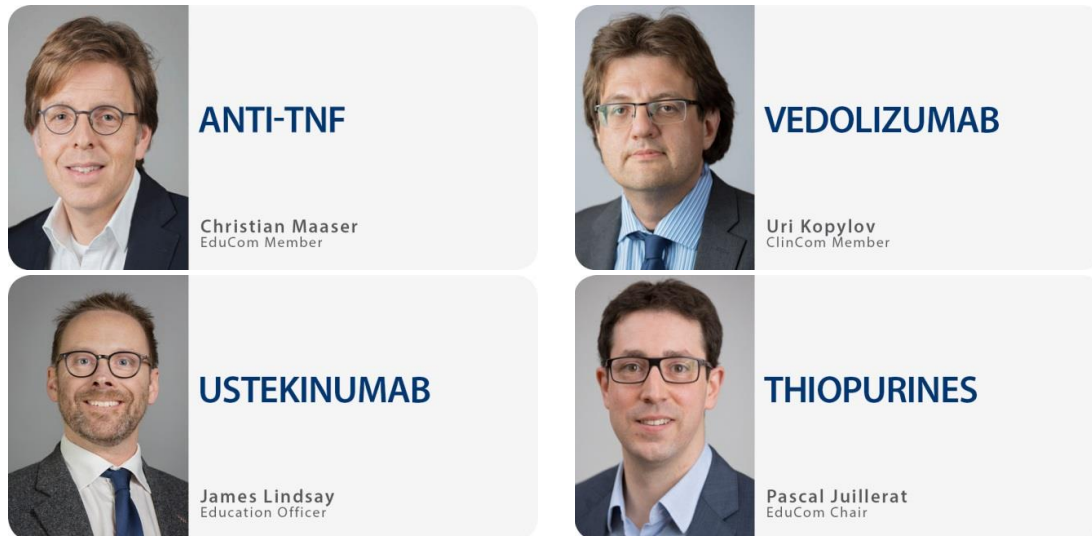

Antonino Spinelli
GuiCom Member

Very recently, we have recorded four new **Educational Audio Podcasts** which are now freely available on the e-Learning platform. The Educational Audio Podcasts aimed to introduce specific drugs used in the management of IBD. To find out more listen to these brand-new podcasts on the [e-Learning platform](#):

- Anti-TNFs
- Vedolizumab
- Ustekinumab
- Thiopurines

In continuation of our series of the Transatlantic Talking Heads, in collaboration with the Crohn's & Colitis Foundation, we recorded a great discussion between European and American IBD experts on "Therapeutic drug monitoring and IBD".

Other exciting material was recorded during the ECCO Autumn Meetings in September 2019, including new **Talking Heads** videos and **Skills Videos** which are currently in post-production. Additionally, the ECCO **e-Guide** is currently receiving a face-lift – the new version will include introductory videos to the brand-new calculators and scores. And don't forget, this represents just a small proportion of the e-learning content which is freely available to all ECCO members.

Stay tuned to find out when new content is released and keep yourself up to date by visiting the [ECCO e-Learning platform](#).
